Green Steam Locomotive

Manufacturer

Ernst Plank

Year

1900s

Category

Train/Tram

Description

Black locomotive dating to approximately 1905; the tender is missing.

Rare early 20th-century tinplate steam locomotive, hand-lacquered in green with black boiler and yellow lining. Features a visible clockwork drive, spoked wheels, and front-mounted coupling. This is a highly decorative model from one of the pioneering German toy train makers.

Category

Train/Tram

Description

Set of two long green coaches with original packaging. The paint has been damaged by contact with the plastic packaging; the damage is documented in the photographs.

This is a matched pair of prewar O-gauge (Spur 0) tinplate railway coaches by Bing, comprising: Personenwagen (passenger coach) 2nd/3rd class, catalogue number 10/523 Packwagen (luggage/goods van), catalogue number 10/524 Both are lithographed in green and yellow detailing with brown roofs, metal undercarriage and four axles. Original labeled boxes are present for both pieces.

Transformer 20 V

Manufacturer

Bing

Year

1910s

Category

Train/Tram

Description

Tested and functional, with its original Bakelite Schuko plug. The transformer is the lower-power 25 VA version.

An early Bing TK1 model train transformer, produced by Gebrüder Bing AG in Nuremberg around 1910–1930. It was designed to convert household AC mains current to low-voltage AC for tinplate model trains and retains its heavy metal housing, rotating voltage selector, original black fabric-covered cord, and early black Bakelite Schuko plug. Its electrical safety has not been verified to modern standards and it should not be connected to mains power without professional inspection or rewiring.

Category

Train/Tram

Description

Set of three coaches, finished in red, brown, and green.

Set of 3 tinplate 2nd class passenger wagons in Gauge 0 (Spur 0), likely made by Bing. The trio includes two burgundy/brown and one green coach, all hand-lithographed or painted with yellow trim, curved brown roofs, and black bases with white metal wheels. These were produced as clockwork-compatible or rolling stock items, typically part of a complete train set.

Train/Tram

Description

Large station dating to approximately 1910–1930, with flag, clock, and telegraph wires.

An original early Bing railway station made around 1910–1920, tinplate construction, vividly lithographed with 2 attached waiting halls. The piece includes 4 working doors, a clock tower with metal flag and original rooftop rigging. The interior retains the original light fixture and wiring. This example is from a family collection, unrestored and retains its original paint and finish.

Description

The tender with the railing originally came with locomotive ID 429.

Original tinplate tenders made by Bing for Spur 0 (Gauge 0) clockwork or live steam toy locomotives. One is a coal tender with embossed coal load and cast metal wheels, the other is a more open-style tender with green side panels and black railing detail. Both feature original paint and couplings, designed for use with early 20th-century Bing locomotives.

Set of eight short curved track sections.

This is a complete set of 8 tinplate curved track sections for use with Bing's Gauge 0 (Spur 0) model trains. Manufactured in Germany in the early 20th century, these classic track pieces were part of Bing’s extensive line of clockwork and early electric trains. These are designed to form a full circle or be integrated into a larger layout, ideal for collectors recreating period-accurate vintage setups.

Train/Tram

Description

Gauge 0, three-rail, 20 V electric set comprising one green SNCF BB-8051 locomotive, one long green baggage coach, one long green passenger coach, and one original green Meccano transformer. The set has been tested and runs very well on well-preserved three-rail track.

This is a complete Hornby Meccano electric train set, titled "Le Mistral," housed in original period box with labeled compartments. The set includes an electric locomotive, two passenger cars, a matching Meccano transformer, curved rails, and connectors. It represents a French express train in the SNCF Paris–Lyon–Avignon–Marseille line.

The lot includes cables, track-connection accessories for Gauge 0 and Gauge 1, large and small cable plugs, long and short plastic window strips for coaches, and two sets of spare Bing coach couplings.

A comprehensive assortment of vintage model railway parts, mainly for Gauge 0 with some Gauge 1 components. The lot includes celluloid window strips, couplers, electrical track connectors, cloth-insulated hookup wires, plug connectors, Märklin and Bing contact plates, and various track pieces. Many components are original, while some may be reproductions or new old stock.
