Train/Tram

Description

Ispravan, isproban, originalni Bakelite Schuko (uslikao sam razliku od standardnog), slabije jakosti (25 VA)

This is an early Bing TK1 model train transformer, produced by Gebrüder Bing AG in Nuremberg, Germany, around 1910–1930. It was designed to convert household AC mains current into safe low-voltage AC for powering tinplate model trains. The transformer features a heavy metal housing, a rotating voltage selector lever, and retains its original black fabric-covered cord complete with the correct early black Bakelite Schuko plug — a nice authentic feature that collectors appreciate.

Note: Due to age, always state it is sold as a collectible display item — not guaranteed to meet modern electrical safety standards without inspection or rewiring.

Description

3 komada - crveni, smeđi, zeleni

Set of 3 tinplate 2nd class passenger wagons in Gauge 0 (Spur 0), likely made by Bing. The trio includes two burgundy/brown and one green coach, all hand-lithographed or painted with yellow trim, curved brown roofs, and black bases with white metal wheels. These were produced as clockwork-compatible or rolling stock items, typically part of a complete train set.

Description

1910/30, velika, sa zastavom, satom i telegrafskim žicama

An original early Bing railway station made around 1910–1920, tinsplate construction, vividly lithographed with 2 attached waiting halls. The piece includes 4 working doors, a clock tower with metal flag and original rooftop rigging. The interior retains the original light fixture and wiring. This example is from a family collection, unrestored and retains its original paint and finish.

Description

Ovaj tender sa ogradicom je došao sa lokomotivom ID:429

Two original tinsplate tenders made by Bing for Spur 0 (Gauge 0) clockwork or live steam toy locomotives. One is a coal tender with embossed coal load and cast metal wheels, the other is a more open-style tender with green side panels and black railing detail. Both feature original paint and couplings, designed for use with early 20th-century Bing locomotives.

Description

+ tender Bing br. 1012 + 3 putnička vagona Bing s natpisom "Pennsylvania Lines" i "Parkville" (vagoni smeđe-crvene boje)

This is a prewar O gauge clockwork-operated passenger train set by Bing, consisting of a black lithographed steam locomotive, tender marked "1012", and three brown lithographed Pennsylvania Lines "Parkville" passenger coaches. The lithographed detailing is typical of Bing's early 20th-century production and aimed at replicating American railroad themes for the export market.

Izlaz: 75 V.A. 23 V (16-23 V) + drv. kutija

Heavy-duty model railway transformer housed in a robust black metal casing, model no. 13465C, sold with a wooden storage box likely used for shipping or storage. The item originates from a Märklin Spur 0 and Spur 1 collection and includes original-style labeling on the box (though noted to be a copy). Intended for use with Märklin's large gauge model trains, this industrial-style transformer has significant collector interest.

Description

Lokomotiva odlično restaurirana

This is a Märklin R 890 wind-up (clockwork) locomotive for Gauge 0 (Spur 0), complete with matching tender, wind-up key, and a section of rail track for display. The R 890 was part of Märklin's post-war production line of tinsplate trains, aimed at collectors and children alike. The tender is in original condition, while the locomotive itself has undergone a careful optical and possibly technical restoration (likely by Ritter, a well-known Märklin specialist).

Description

Oznaka E 225 001, zelena, neuwertig

A tinsplate O gauge (Spur 0) electric locomotive model made by ETS, representing the Czech State Railways (CSD) type E 225 001 in green livery. This version is analogue-controlled and DC-powered, with functional pantograph detail and simple tinsplate construction, typical of ETS's vintage-style output.

Description

Niskoprofilne: 12 zakrivljenih, 2 priključne, 1 granična (s odbojnikom)

A grouped lot of vintage Spur 0 (O gauge) model railway track components by ETS, primarily manufactured in the Czech Republic. This includes straight connection track sections, curved brass-profile track pieces, and a bumper (buffer stop) with brass rails and wooden impact bar. These pieces are designed for analog DC current model railways and replicate realistic profile dimensions in larger scale layouts.
